Our positive results to date, combined with our constructive outlook, allows us to increase our annual earnings guidance for 2018. We have a healthy pipeline of opportunities supported by our unique expertise in experiential assets, which we believe positions us well to continue to deliver excellent results.”

The Company agreed to extend this lease for the months of September and October 2018 and the monthly rent of \$1.0 million has been paid for each of these months. If the new month-to-month lease is not further extended, CLA will be required to expeditiously vacate these properties, in which case the Company intends to lease some or all of the 21 schools to other operators.

CLA continues to negotiate with third parties regarding a restructuring that would permit CLA to continue operation of the CLA properties. In addition, the Company is actively pursuing other alternatives for these properties, including replacement tenants and operators.

Capital Recycling

During the third quarter of 2018, the Company received \$94.9 million in proceeds from OZRE representing payment in full on the remaining mortgage note receivable of \$74.9 million that was secured by six ski properties plus prepayment fees totaling \$20.0 million that are included in mortgage and other financing income. (A) NAREIT developed FFO as a relative non-GAAP financial measure of performance of an equity REIT in order to recognize that income-producing real estate historically has not depreciated on the basis determined under GAAP and management provides FFO herein because it believes this information is useful to investors in this regard. FFO is a widely used measure of the operating performance of real estate companies and is provided here as a supplemental measure to GAAP net income available to common shareholders and earnings per share. Pursuant to the definition of FFO by the Board of Governors of NAREIT, the Company calculates FFO as net income available to common shareholders, computed in accordance with GAAP, excluding gains and losses from sales of depreciable operating properties and impairment losses of depreciable real estate, plus real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships, joint ventures and other affiliates. Adjustments for unconsolidated partnerships, joint ventures and other affiliates are calculated to reflect FFO on the same basis. The Company has calculated FFO for all periods presented in accordance with this definition. In addition to FFO, the Company presents FFO as adjusted. Management believes it is useful to provide FFO as adjusted as a supplemental measure to GAAP net income available to common shareholders and earnings per share. FFO as adjusted is FFO plus costs (gain) associated

with loan refinancing or payoff, transaction costs, retirement severance expense, litigation settlement expense, preferred share redemption costs, termination fees associated with tenants' exercises of education properties buy-out options, impairment of direct financing lease (allowance for lease loss portion) and provision for loan losses, and by subtracting gain on early extinguishment of debt, gain (loss) on sale of land, gain on insurance recovery and deferred tax benefit (expense). FFO and FFO as adjusted are non-GAAP financial measures. FFO and FFO as adjusted do not represent cash flows from operations as defined by GAAP and are not indicative that cash flows are adequate to fund all cash needs and are not to be considered an alternative to net income or any other GAAP measure as a measurement of the results of the Company's operations, cash flows or liquidity as defined by GAAP. It should also be noted that not all REITs calculate FFO or FFO as adjusted the same way so comparisons of each of these non-GAAP measures with other REITs may not be meaningful.

The conversion of the 5.75% Series C cumulative convertible preferred shares and the 9.00% Series E cumulative convertible preferred shares would be dilutive to FFO and FFOAA per share for the three and nine months ended September 30, 2018. Therefore, the additional 2.1 million common shares and 1.6 million common shares that would result from the conversion and the corresponding add-back of the preferred dividends declared on those shares are included in the calculation of diluted FFO per share and diluted FFOAA per share for the three and nine months ended September 30, 2018.

The conversion of the 5.75% Series C cumulative convertible preferred shares would be dilutive to FFO and FFOAA per share for the three and nine months ended September 30, 2017. Therefore, the additional 2.1 million common shares that would result from the conversion and the corresponding add-back of the preferred dividends declared on those shares are included in the calculation of diluted FFO and diluted FFOAA per share for the three and nine months ended September 30, 2017. The effect of the conversion of our 9.0% Series E cumulative convertible preferred shares and the additional 1.6 million common shares that would result from the conversion do not result in more dilution to per share results and are therefore not included in the calculation of diluted FFO and FFOAA per share data for the three and nine months ended September 30, 2017.

Net Debt to Adjusted EBITDA Ratio

Net Debt to Adjusted EBITDA Ratio is a supplemental measure derived from non-GAAP financial measures the Company uses to evaluate its capital structure and the magnitude of its debt against its operating performance. The Company believes that investors commonly use versions of this ratio in a similar manner. In addition, financial institutions use versions of this ratio in connection with debt agreements to set pricing and covenant limitations. The Company's method of calculating Net Debt to Adjusted EBITDA Ratio may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs. Reconciliations of debt and net income (both reported in accordance with GAAP) to Net Debt, EBITDAre, Adjusted EBITDA, and Net Debt to Adjusted EBITDA Ratio (each of which is a non-GAAP financial measure) are included in the following tables (unaudited, in thousands):

	September 30,

Adjusted EBITDA (1) (D)	<u>\$ 551,492</u>	<u>\$ 531,948</u>
Net Debt/Adjusted EBITDA Ratio	5.3	5.7

(1) Adjusted EBITDA for the quarter is multiplied by four to calculate an annual amount.

(B) Net Debt represents debt (reported in accordance with GAAP) adjusted to exclude deferred financing costs, net and reduced for cash and cash equivalents. By excluding deferred financing costs, net and reducing debt for cash and cash equivalents on hand, the result provides an estimate of the contractual amount of borrowed capital to be repaid, net of cash available to repay it. The Company believes this calculation constitutes a beneficial supplemental non-GAAP financial disclosure to investors in understanding our financial condition. The Company's method of calculating Net Debt may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs.

(C) NAREIT developed EBITDAre as a relative non-GAAP financial measure of REITs, independent of a company's capital structure, to provide a uniform basis to measure the enterprise value of a company. Pursuant to the definition of EBITDAre by the Board of Governors of NAREIT, the Company calculates EBITDAre as net income, computed in accordance with GAAP, excluding interest expense (net), income tax expense (benefit), depreciation and amortization, gains and losses from sales of depreciable operating properties, impairment losses of depreciable real estate, costs (gain) associated with loan refinancing or payoff and adjustments for unconsolidated partnerships, joint ventures and other affiliates.

Management provides EBITDAre herein because it believes this information is useful to investors as a supplemental performance measure as it can help facilitate comparisons of operating performance between periods and with other REITs. EBITDAre does not represent cash flow from operations as defined by GAAP and is not indicative that cash flows are adequate to fund all cash needs and is not to be considered an alternative to net income or any other GAAP measure as a measurement of the results of the Company's operations or cash flows or liquidity as defined by GAAP.

(D) Management uses Adjusted EBITDA in its analysis of the performance of the business and operations of the Company. Management believes Adjusted EBITDA is useful to investors because it excludes various items that management believes are not indicative of operating performance, and that it is an informative measure to use in computing various financial ratios to evaluate the Company. The Company defines Adjusted EBITDA

as EBITDAre (defined above) excluding gain on insurance recovery, retirement severance expense, litigation settlement expense, impairment of direct financing lease (allowance for lease loss portion), the provision for loan losses, transaction costs and prepayment fees, and which is then multiplied by four to get an annual amount.

The Company's method of calculating Adjusted EBITDA may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs. Adjusted EBITDA is not a measure of performance under GAAP, does not represent cash generated from operations as defined by GAAP and is not indicative of cash available to fund all cash needs, including distributions. This measure should not be considered as an alternative to net income for the purpose of evaluating the Company's performance or to cash flows as a measure of liquidity.
