Both the guidance for the remainder of 2014 and for 2015 reflect the Adelaar project at its status quo, pending the outcome of the award of certain casino gaming licenses by the state of New York, expected to be announced in the fourth quarter of 2014.

(A) The National Association of Real Estate Investment Trusts (“NAREIT”) developed FFO as a relative non-GAAP financial measure of performance of an equity REIT in order to recognize that income-producing real estate historically has not depreciated on the basis determined under GAAP and management provides FFO herein because it believes this information is useful to investors in this regard. FFO is a widely used measure of the operating performance of real estate companies and is provided here as a supplemental measure to GAAP net income available to common shareholders and earnings per share. Pursuant to the definition of FFO by the Board of Governors of NAREIT, we calculate FFO as net income available to common shareholders, computed in accordance with GAAP, excluding gains and losses from sales or acquisitions of depreciable operating properties and impairment losses of depreciable real estate, plus real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships, joint ventures and other affiliates. Adjustments for unconsolidated partnerships, joint ventures and other affiliates are calculated to reflect FFO on the same basis. We have calculated FFO for all periods presented in accordance with this definition. FFO is a non-GAAP financial measure. FFO does not represent cash flows from operations as defined by GAAP and is not indicative that cash flows are adequate to fund all cash needs and is not to be considered an alternative to net income or any other GAAP measure as a measurement of the results of our operations or our cash flows or liquidity as defined by GAAP. It should also be noted that not all REITs calculate FFO the same way so comparisons with other REITs may not be meaningful. In addition to FFO, we present FFO as adjusted. Management believes it is useful to provide it here as a supplemental measure to GAAP net income available to common shareholders and earnings per share. FFO as adjusted is FFO plus provision for loan losses, costs (gain) associated with loan refinancing or payoff, net, preferred share redemption costs and transaction costs (benefit), less gain on early extinguishment of debt, gain (loss) on sale of land and deferred tax benefit (expense). FFO as adjusted is a non-GAAP financial measure. FFO as adjusted does not represent cash flows from operations as defined by GAAP

and is not indicative that cash flows are adequate to fund all cash needs and is not to be considered an alternative to net income or any other GAAP measure as a measurement of the results of the Company's operations, cash flows or liquidity as defined by GAAP.

The additional 1.9 million common shares that would result from the conversion of the Company's 5.75% Series C cumulative convertible preferred shares and the additional 1.6 million common shares that would result from the conversion of the Company's 9.00% Series E cumulative convertible preferred shares and the corresponding add-back of the preferred dividends declared on those shares are not included in the calculation of diluted earnings per share and FFO per share for the three and nine months ended September 30, 2014 and 2013 because the effect is not-dilutive.
