Capital Recycling

The Company continues to make excellent progress on its asset disposition and capital recycling plan. During the fourth quarter, the Company sold ten properties for total proceeds of approximately \$90.4 million and recognized a net gain on sale of real estate of \$1.4 million.

Eight of the properties sold were public charter schools previously leased to Imagine Schools under a master lease. Seven of these eight properties were sold to Imagine and the other one was sold to a third party. In conjunction with these sales the Company received proceeds totaling \$87.2 million, consisting of \$20.1 million in cash and a mortgage note receivable from Imagine. Imagine also added four additional public charter school properties as further collateral for the mortgage note. No gain or loss was recognized on the sale of these schools. Accordingly, as of year-end, the Company's investments with Imagine consisted of 12 public charter school properties remaining under the master lease that had a carrying value of \$102.7 million, and a five year \$70.3 million mortgage note receivable with amortization bearing interest at 7% that was secured by 11 public charter school properties.

For the year ended December 31, 2016, the Company received asset disposition proceeds totaling \$186.4 million, including the \$91.3 million from sales of properties previously leased to Imagine discussed above. In 2017, the Company expects an additional \$150.0 million to \$300.0 million of asset disposition proceeds, including approximately \$50.0 million from sales of additional public charter schools currently leased to Imagine.

The notes bear interest at an annual rate of 4.75% and are guaranteed by certain of the Company's subsidiaries. The Company used the net proceeds from the note offering to pay down its unsecured revolving credit facility, invest in mortgage notes secured by education properties and for general business purposes.

CNL Transaction Update

As previously announced, on November 2, 2016, the Company and Ski Resort Holdings LLC ("SRH"), an entity owned by funds affiliated with Och-Ziff Real Estate, entered into a Purchase and Sale Agreement with CNL Lifestyle Properties, Inc. ("CNL") and certain of its affiliates. The agreement provides for the Company's acquisition of the Northstar California Ski Resort, 15 attraction properties (waterparks and amusement parks) and five small family entertainment centers for aggregate consideration valued at approximately \$456.0 million. Additionally, the Company has agreed to provide approximately \$244.0 million of five-year secured debt financing to SRH for the purchase of 14 CNL ski properties valued at approximately \$374.0 million. This debt financing will be secured by mortgages on all of the assets being acquired by SRH.

The CNL transaction is subject to customary closing conditions, including the approval of the transaction by stockholders holding a majority of the outstanding shares of common stock of CNL and various third party consents and governmental permits. The special meeting of CNL stockholders has been scheduled for March 24, 2017. It is anticipated that this transaction will close in the second quarter of 2017; however, there can be no assurances as to the actual closing or the timing of the closing.

2017 Guidance

The Company is confirming its 2017 guidance for FFO as adjusted per diluted share of a range of \$5.05 to \$5.20. In addition, the Company is confirming its 2017 investment spending guidance of a range of \$1.30 billion to \$1.35 billion. In addition to the on-going investments in each of our primary business segments, this guidance includes the estimated impact of the planned investments associated with the CNL transaction totaling approximately \$700.0

million as well as the estimated impact of planned asset dispositions, both of which are discussed further above. There can be no assurances that these transactions will occur.

FFO as adjusted guidance for 2017 is based on FFO per diluted share of \$4.71 to \$4.82 adjusted for estimated transaction costs, termination fees related to education properties and deferred income tax benefit. FFO per diluted share is based on a net income per diluted share range of \$3.52 to \$3.67 less estimated gain on sale of real estate of a range of \$0.52 to \$0.56 and the impact of Series C and Series E dilution of \$0.05, plus estimated real estate depreciation of \$1.76 per diluted share (in accordance with the NAREIT definition of FFO).

(A) NAREIT developed FFO as a relative non-GAAP financial measure of performance of an equity REIT in order to recognize that income-producing real estate historically has not depreciated on the basis determined under GAAP and management provides FFO herein because it believes this information is useful to investors in this regard. FFO is a widely used measure of the operating performance of real estate companies and is provided here as a supplemental measure to GAAP net income available to common shareholders and earnings per share. Pursuant to the definition of FFO by the Board of Governors of NAREIT, the Company calculates FFO as net income available to common shareholders, computed in accordance with GAAP, excluding gains and losses from sales [or acquisitions] of depreciable operating properties and impairment losses of depreciable real estate, plus real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships, joint ventures and other affiliates. Adjustments for unconsolidated partnerships, joint ventures and other affiliates are calculated to reflect FFO on the same basis. The Company has calculated FFO for all periods presented in accordance with this definition. FFO is a non-GAAP financial measure. FFO does not represent cash flows from operations as defined by GAAP and is not indicative that cash flows are adequate to fund all cash needs and is not to be considered an alternative to net income or any other GAAP measure as a measurement of the results of our operations or our cash flows or liquidity as defined by GAAP. In addition to FFO, the Company presents FFO as adjusted. Management believes it is useful to provide it here as a supplemental measure to GAAP net income available to common shareholders and earnings per share. FFO as adjusted is FFO plus provision for loan losses, costs (gain) associated with loan refinancing or payoff, net, retirement severance expense, preferred share redemption costs, termination fees associated with tenants' exercises of education properties buy-out options and transaction costs (benefit), less gain on early extinguishment of debt, gain (loss) on sale of land, gain on insurance recovery and deferred tax benefit (expense). FFO as adjusted is a non-GAAP financial measure. FFO as adjusted does not represent cash flows from operations as defined by GAAP and is not indicative that cash flows are adequate to fund all cash needs and is not to be considered an alternative to net income or any other GAAP measure as a measurement of the

results of the Company's operations, cash flows or liquidity as defined by GAAP. It should also be noted that not all REITs calculate FFO or FFO as adjusted the same way so comparisons of each of these non-GAAP measures with other REITs may not be meaningful.

The conversion of the 5.75% Series C cumulative convertible preferred shares would be dilutive to FFO per share and FFOAA for the three months and years ended December 31, 2016 and 2015. Therefore, the additional 2.0 million common shares that would result from the conversion and the corresponding add-back of the preferred dividends declared on those shares are included in the calculation of diluted FFO and diluted FFOAA per share for these periods. The effect of the conversion of our 9.0% Series E cumulative convertible preferred shares and the additional 1.6 million common shares that would result from the conversion do not result in more dilution to per share results and are therefore not included in the calculation of diluted per share data for the three months and years ended December 31, 2016 and 2015.

Net Debt to Adjusted EBITDA Ratio

Net Debt to Adjusted EBITDA Ratio is a supplemental measure derived from non-GAAP financial measures the Company uses to evaluate its capital structure and the magnitude of its debt against its operating performance. The Company believes that investors commonly use versions of this ratio in a similar manner. In addition, financial institutions use versions of this ratio in connection with debt agreements to set pricing and covenant limitations. The Company's method of calculating Net Debt to Adjusted EBITDA Ratio may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs. Reconciliations of debt and net income available to common shareholders (both reported in accordance with GAAP) to Net Debt, Adjusted EBITDA, and Net Debt to Adjusted EBITDA Ratio (each of which is a non-GAAP financial measure) are included in the following tables (unaudited, in thousands):

(2) Included in other income in the accompanying consolidated statements of income. Other income includes the following:

	Three Months Ended December 31,	
	2016	2015
Income from settlement of foreign currency swap contracts	\$ 705	\$ 705
Fee income	1,588	—
Gain on insurance recovery	847	—
Miscellaneous income	87	508
Other income	<u>\$ 3,227</u>	<u>\$ 1,213</u>

(3) Adjusted EBITDA for the quarter is multiplied by four to calculate an annual amount.

(B) Net Debt represents debt (reported in accordance with GAAP) adjusted to exclude deferred financing costs, net and reduced for cash and cash equivalents. By excluding deferred financing costs, net and reducing debt for cash and cash equivalents on hand, the result provides an estimate of the contractual amount of borrowed capital to be repaid, net of cash available to repay it. The Company believes this calculation constitutes a beneficial supplemental non-GAAP financial disclosure to investors in understanding our financial condition. The Company's method of calculating Net Debt may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs.

(C) Management uses Adjusted EBITDA in its analysis of the performance of the business and operations of the Company. Management believes Adjusted EBITDA is useful to investors because it excludes various items that management believes are not indicative of operating performance, and that it is an informative measure to use in computing various financial ratios to evaluate the Company. The Company defines Adjusted EBITDA as net income available to common shareholders excluding costs associated with loan refinancing or payoff, interest expense (net), depreciation and amortization, equity in (income) loss from joint ventures, gain (loss) on the sale of real estate, gain on insurance recovery, income tax expense (benefit), preferred dividend requirements, the effect of non-cash impairment charges, retirement severance expense, the provision for loan losses and transaction costs (benefit), and which is then multiplied by four to get an annual amount.

The Company's method of calculating Adjusted EBITDA may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs. Adjusted EBITDA is not a measure of

performance under GAAP, does not represent cash generated from operations as defined by GAAP and is not indicative of cash available to fund all cash needs, including distributions. This measure should not be considered as an alternative to net income for the purpose of evaluating the Company's performance or to cash flows as a measure of liquidity.
